Experience

- **DXC Technologies** Apr 2010 – present Sr Analyst I Software Engineering
- **Wipro Technologies** Jan 2008 – Apr 2010 Senior Test Engineer
- **HCL Technologies** Mar 2005 – Dec 2007 Test Engineer

Profile Summary

- Certified Project Management Professional (PMP®) with 20+ years of experience in automation testing, data quality and reconciliation testing, API validation, and cross-functional project leadership
- Skilled in Selenium, UFT, API testing, Azure DevOps, ETL testing, and BOXI report testing across Healthcare, Telecom, Retail, and Oil & Gas domains. Experienced in leveraging PySpark, Python, and Pandas for large-scale data validation, reconciliation, and Parquet/JSON dataset comparison.
- Managed all aspects of successful project execution, including contract governance ,client expectation management and satisfaction, financial results, team performance and delivery of quality work. Defined, implemented, and managed manual / automated functional test procedures and processes: Scope definition, script creation, delivery estimates, automation library design, test scheduling, progress reporting and quality signoff.
- Managed end-to-end QA activities for the solution delivery team by defining tailored QA processes for various project types, processes and technologies (SAFe, DevOps, PEGA, API, Azure Activity Functions, Storage Containers). Implemented a seamless QA integration for client's Mid Continental Business Unit's IT operations groups
- Led QA teams supporting the Company's solution delivery across regular, fast-track, and off-cycle releases. Managed and guided teams performing requirement ambiguity analysis, test scenario reviews with business analysts, test case preparation, test execution, and comprehensive defect triage and lifecycle management.
- Responsible for collaborating with Release Management to prioritize and plan actions effectively. Planned and coordinated quarterly Performance Service Review meetings with IT leadership to present insights on service performance, work volume and pace, resource planning, supported applications (custom and vendor), and solution delivery projects—enabling informed decisions and potential adjustments to align with Service Orders
- Core implementation skills in test automation using Selenium WebDriver, Java, TestNG, ADO, UFT 14.03, Python scripting, establishing Azure DevOps Pipelines, Repos

- Ability to coordinate the flow of testing initiatives and experience in Requirement Analysis, Design, Development, all the phases of Testing - System testing, Integration Testing, Regression testing, Performance, Acceptance testing,Pairwise testing
- Proven experience working with cloud-based systems, with knowledge of cloud infrastructure, deployment pipelines, and integration testing in distributed environments.Experienced in Microsoft Azure - Scrum Boards,Sprints,Dashboards,pipelines,Backlogs,Queries
- Experienced in working with ETL,database ,SAP BOXI Reports. Experienced in extended validation of report functionality developed, using Business Objects, by writing SQLs at the backend
- Experienced in creating & maintaining the artifacts for the Information security Management Systems Audits and process Audits
- Building the team right from identifying, screening, onboarding, training and inducting into project, as well managing the operations, quality and financials.
- Developing and managing project budgets and collaborate with Account Executive, segment leader and Account Delivery Lead to understand demand requirements and responsible for working with the Central Demand Entry Team to ensure demand is accurately created and updated in PPM Tool
- Conduct regular RAG (Red–Amber–Green) status assessments for account health, analyzing project performance metrics across scope, schedule, budget, and risks, and present actionable insights to senior management.
- Experience in managing client workorder revisions and worker contract extensions, client timesheet approval processes using SAP Fieldglass

Skillset

- **Project Management:** PPM, PSA, SAP Fieldglass, Agile (Scrum/SAFe)
- **QA Tools:** Selenium WebDriver, UFT, TestNG, TOSCA, ALM, QC, PostMan,
- **Cloud & DevOps:** Microsoft Azure (Pipelines, Boards, Repos, DevOps, storage containers, Azure Application Insights),AWS S3
- **Programming Languages:** Java, Python, VBScript
- **Frameworks & Big Data:** PySpark; Automation Frameworks – Hybrid, Data-Driven, Modular
- **Libraries:** Pandas
- **Test Types:** Functional, Automation, Integration, Regression, Performance, UAT, ETL, API, Security (SAST/DAST)
- **Databases/Reporting:** SQL, SAP BOXI, Business Objects
- **Data Formats:** Parquet, JSON

Professional Certifications

- Project Management Professional (PMP)® – PMI
- AWS Certified Cloud Practitioner
- Microsoft Azure - AZ900 & AI900
- ISTQB – Advanced Level Test manager
- Tricentis TOSCA Automation Specialist Level 1
- Certified Scrum Master
- HP Accredited integration Specialist (AIS)

Rewards / Recognitions

- FY23 – Q4, FY23 Q2, FY22 Q1 DXC Champs Awards – for consistent commitment to excellence
- Exceptional Impact performer for consecutive years
- Internal Facilitator Reward for contribution made towards Learning and development of the organization.
- DXC Recognition Emerald Award for extended support in Talent management
- Received Certificate of Merit from the DXC organization for the outstanding efforts in Automation for Kaiser Project

Engagement Summary

Project : Chevron MCBU Solution Delivery Applications (Nov 2022 to Till Date)
Client : Chevron Corp, US

Role / Responsibilities:

- Responsible for the delivery of Managed QA services for Chevron's Mid-Continent Business Unit (MCBU). Managed Testing Services for Chevron's custom applications , geological and geophysical applications.
- Managed, planned, and coordinated service performance, workload volume and pace, resource allocation, and support for both custom and vendor applications. Regularly reviewed solution delivery projects to identify and implement potential adjustments aligned with Service Order requirements.
- Delivering technical and functional validations of OMNI PEGA, JOYN Middleware, TASQ, Energy component systems through Test planning, scheduling, execution, tracking and review with defined QA and industry best practices. Responsible for successful delivery of Test Automation services as agreed and documented in the contract work order. Leading and managing project teams to execute project tasks and deliverables within time, scope and budget

- Responsible for Key Project creation Activities inclusive of Project registration, Adding Schedule /scope/plan and approvals in Portfolio & Project Management tool (PPM)

- Work with project resources, program resources, leaders, clients to achieve the committed results for both the organization and client.

- Manage, Lead, plan & execute the activities related to Test Automation (Selenium, UFT 14.03) for OMNI Centaur, Energy Components applications.

- Involved in design and implementation of Selenium WebDriver Automation Framework for Smoke test and Regression test.

- Involved in design and implementation of UFT/ALM Test Automation Framework

- Managed and conducted System testing, Integration testing, Functional testing, UAT, Production Testing and Regression testing.

- Responsible for analyzing, generating, estimating and delivering Testing artifacts and ensuring that Project Processes (Agile Standards) are implemented properly.

- Providing direction and guidance to peers on any aspect of testing, including training for testers wherever appropriate

- Track and update Risks, issues, changes and G2G Actions. Update finance, schedules, address non-compliance and updating in Portfolio & Project Management tool (PPM) / Run services Portal

- Publish Delivery status report in Portfolio & Project Management tool and generate weekly, monthly and quarterly status reports to senior leadership, tracking the delivery metrics and identifying areas of improvements.

- Manage, Review and Approve worker timesheets, invoices, workorder revisions and worker contract extensions in SAP Field glass.

Project : Chevron Daily Allocation, IEMF (Nov 2017 to Nov 2022)

Role / Responsibilities:

- Manage , Lead and plan the activities related to Test Automation (Selenium, UFT 14.03) , Functional testing for different applications IEMF, PLWOL, Daily Allocation

- Core design, development ,implementation skills in automation using Selenium WebDriver, Java, TestNG, ADO, UFT 14.03

- Involved in design and implementation of Selenium WebDriver Automation Framework for Smoke test and Regression test

- Responsible for analyzing, generating, estimating and delivering Testing artifacts and ensuring that Project Processes (Agile Standards) are implemented properly

- Planning and control meetings with client/ staff during test planning and throughout subsequent testing activities
- Database validation of all applications. Ensuring the data correctness in DB tables pre and post deployment.
- Managed and conducted System testing, Integration testing, Functional testing, UAT and Regression testing
- Providing direction and guidance to peers on any aspect of testing, including training for testers wherever appropriate

Project : AT&T – Dolphin (Apr 2013 to Nov 2017) Client : AT&T, US

Role / Responsibilities :

- Manage , Lead and plan the activities related to Test Automation (UFT 12.5),BOXI Reports testing/ETL Testing
- Responsible for analyzing, generating, estimating and delivering Testing artifacts and ensuring that Project Processes (ITUP / Agile Standards/TDP) are implemented properly
- Planning and control meetings with client/ staff during test planning and throughout subsequent testing activities
- Driving the Knowledge transfer sessions for the effective transition required for AT&T dolphin project
- Defined, developed and implemented reusable test automation framework
- Setup test environment for testing including planning ,identifying test data and creation of test data using automation
- Developing automation Scripts, development of reusable actions and user defined functions
- Validating the Business Objects report by running the SQL queries on the database by reviewing the report requirement documentation
- Validating the reporting objects in the reporter against the design specification document
- Validating the load process of ETL against the data mapping provided with transformation rules.
- Providing direction and guidance to peers on any aspect of testing, including training for testers wherever appropriate

Project : Kaiser OPPR (Apr 2010 to Apr 2013) **Client : Kaiser Permananante, US**

Role / Responsibilities :

- Design and Development of Automation Framework (Hybrid Framework),development of Reusable Actions and functions (user defined functions in UFT)
- Design and development of Database related functions (access the database, accessing the record set and using it in the automation scripts) using VBScript to support the ETL team
- Creation of Test Generation Tool to generate and validate the test data Files ,that can be replaced with the Golden Gate Extract files at the time of ETL job execution and validation
- As a part of Datawarehouse testing, creation of test automation suite using QTP 9.2 for test data setup for POS-GL and DW-GL scenarios
- Creation of Individual automation scripts using QTP 9.2 to validate User access,groups & roles administration across various applications for Security testing
- As a part of Performance testing,creation of automation scripts for prerequisite
- Identification of suitable framework for automation and implementing the same
- Identification of reusable components and development of reusable actions and functions
- Daily execution of automation batches across different environments for Test data setup
- Lead, plan and direct the activities related to BOXI Reports testing,Canned /Adhoc Reports testing and Label testing
- Manage and measure performance and delivery against work plans, and take corrective action where necessary.
- Planning and control meetings with client/ staff during test planning and throughout subsequent testing activities

Project : INSIGHT WEB STORE AUTOMATION (Jan 2008 to Apr 2010) **Client :** Insight Technologies, US

Role / Responsibilities :

- Identification of suitable framework for automation and implementing the same
- Developing automation Scripts using QTP 9.2
- Identification of reusable components and development of reusable actions and functions
- Developing Test Suites for Batch Run execution using QC 9.2

- Daily execution of automation batches across different environments and reporting the results.
- Determining the stability of the builds through batch executions
- Interaction with the clients and gathering the requirement for new automation projects
- Prepare and Submit weekly / monthly updates on the automation scripts reports for various projects.
- Peer review activities and preparing the reports for the same
- Managing Quality Center Users
- Managing User Connections and Licenses in QC

Project : SGB FIREFLY AUTOMATION (June 2007 to Dec 2007) **Client :** SGB, Australia

Role / Responsibilities :

- Automation Feasibility study through QTP 9.2 at client location(SGB Australia)
- Giving Knowledge Transfer to offshore team and preparation of documents for the same
- Involved in preparing and reviewing High Level and Low level Test Scenarios
- Preparation of documents for Coding standards, Framework & Quality Checklist
- Coordinating the onsite/offshore daily status call
- Designing approach for scripting
- Identification of framework
- Automation of Test scripts
- Identification of Reusable components
- Development of Reusable Actions and functions
- Peer Review Activities

Project : WK Tax Prep Automation (Mar 2005 to May 2007) **Client :** Wolter's Kluwer, US

Role / Responsibilities :

- Review of Design Document for Automation and updating the issues through Lotus Notes
- Designing approach for scripting
- Preparation of Datasheets
- Automation of Test scripts
- Development of Reusable Actions and functions
- Uploading and running scripts in the Quality Centre
- Peer Review Activities
- Implementation of Quality Checklist and Templates

EDUCATION

- Bachelor of Engineering in Electrical & Electronics , University of Madras , 2004 – 73.5 %
